My Rez Dog and COVID-19

How can I keep my pets safe during the COVID-19 outbreak?

If you or a family member have confirmed or suspected coronavirus disease (COVID-19) here are some helpful tips to keep care of yourself and your pets:

- You should restrict contact with pets and other animals while sick.
- When possible, have another person care for your animals while you are sick.
- If you must care for your pet, wash your hands before and after you interact with pets and wear a facemask.
- Have your pet sleep at least 6 feet away.

Everyday healthy pet care suggestions:

- Feed pets on a set schedule and make sure they have access to water, shelter, and exercise.
- Do not feed pets human food, raw pet food, or treats that aren’t fully cooked (e.g. pig ears).
- Clean pet food and water bowls daily.
- Store pet food in rodent-proof containers and use a scoop (not your hands) to fill bowls.
- Do not allow pets in food preparation or eating areas.
- Wash your hands with soap and warm water after petting, feeding, and cleaning up after your pet.
